Recent Developments:

In 2024, Amazon reported record sales of \$637.959 billion, an 11% increase from the previous year, with profits doubling to \$59.248 billion. Despite this growth, the company anticipates a slowdown in the first quarter of 2025, projecting sales increases between 5% and 9%. CEO Andy Jassy emphasized a continued focus on cost containment, efficiency, and advancements in artificial intelligence.

Customer Base:

As of recent reports, 83% of U.S. households shop with Amazon, up from 76% four years prior. This growth is attributed to the expansion of product categories, including household goods, and the benefits offered to Amazon Prime members, such as a vast product selection, competitive pricing, and expedited delivery.
